Profile

Software Development Engineer in Test (SDET) with 1.5+ years of experience in designing scalable test automation frameworks using Java, Selenium, and REST Assured. Skilled in building Page Object Model (POM), Data-Driven, and BDD frameworks, with expertise in CI/CD integration and leveraging modern testing practices including AI-assisted test optimization. Expert in building maintainable automation solutions that deliver high-quality software while significantly reducing manual effort across the SDLC.

Experience

Software Engineer, Capgemini – Bangalore, Karnataka Sep 2024 – Present

- Executed 120+ automated test cases using Selenium WebDriver within a custom Java-based automation framework, achieving 85% test coverage and reducing regression cycle time by 78%.
- Engineered scalable test automation frameworks implementing Page Object Model (POM) and Data-Driven patterns with TestNG/JUnit, enabling parallel test execution with 95% test stability.
- Integrated test suites into CI/CD pipeline using Jenkins, Git, and Maven, establishing automated smoke and regression testing on every commit, reducing production defects by 40% through early detection.
- Implemented API test automation strategy using REST Assured and Postman, validating 50+ RESTful endpoints including authentication flows, CRUD operations, and error-handling scenarios.

Projects

Healthcare Web Application Jan 2025 – June 2025

- Designed and executed comprehensive test automation suite covering 40+ automated functional and regression test cases across critical healthcare workflows (appointment booking, online consultation, patient records, prescription management), achieving 95% feature coverage.
- Built robust Page Object Model (POM) framework with reusable components, reducing code duplication and performed cross-browser compatibility testing across Chrome and Edge using Selenium Grid.
- Documented TestNG native reports, Allure/Extent reports, and 10+ defects with severity/priority classification, providing real-time test execution dashboards with pass/fail metrics, screenshots, and execution trends.
- Implemented data-driven testing approach using TestNG DataProvider for Excel-based test data, executing 150+ test scenarios with varied input combinations to validate boundary conditions and negative scenarios

Skills

Programming Languages: Core Java, JavaScript

Frameworks: Selenium, TestNG, JUnit, Cucumber (BDD), Page Object Model (POM), Data-Driven Framework

Database & Data Handling: SQL, MySQL, Apache POI, Test Data Generation

Defect Management: Agile/Scrum, JIRA, Defect Lifecycle Management, Test Reporting

API Testing: REST Assured, RESTful APIs, Postman, JSON/XML Validation

DevOps & AI Tools: Jenkins, GitHub Actions, Git/GitHub, Continuous Testing, Eclipse, Maven, Build Automation, ChatGPT, Claude, GitHub Copilot, Gemini, AI-Assisted Debugging, AI-Assisted Test Case Generation, CI/CD

Web Technologies: HTML, CSS, Node.js

Soft Skills: Problem-Solving, Debugging, Adaptability, Critical Thinking

Education

Chitkara University, B.E. in Computer Science – Baddi, Himachal Pradesh 2020 – 2024

- CGPA: 9.10/10.0

Certifications

- Google AI Essentials Specialization (Coursera)
- Capgemini Ocean L2 Certification - Test Automation Engineer (Selenium)
